3. Text & Formatting Elements H2

Basic Text Structure H3

This is a standard paragraph (`p`). We can emphasize words by making them **bold** using the `` tag, or show text in *italics* using the `<i>` tag.

b

Here is a line break: `br`
The text continues on a new line.

hr

Quotations and Code H3

The **`<blockquote>`** tag is perfect for long quotations from another source. It ensures semantic correctness.

Code

4. List Examples H2

Unordered List (``) H3

- HTML: Structure
- CSS: Style
- JavaScript: Behavior

div

Ordered List (``) H3

1. Plan Structure
2. Write Markup
3. Apply Styles

div

Definition List (`<dl>`) H3

- | | |
|-----------------|--|
| <code>dt</code> | → HTTP
Hypertext Transfer Protocol. |
| <code>dd</code> | → Search Engine Optimization. |

div

5. Links and 8. Media H2

Standard Image: H4

Link Examples: H4

6. Table Example H2

table

TAG NAME	CATEGORY	Th	REQUIRED?	tr
<code><head></code>	Metadata		Yes	tr
<code><nav></code>	Semantic Layout		No	tr
<code><td></code>	Table Content		Yes (in ' <code><tr></code> ')	tr
				<code>tfoot</code>

This table demonstrates proper usage of all table tags.

div

nav

div

9. Article & Aside Usage H2

`P` This **`<article>`** element (simulated here) defines independent, self-contained content, like a blog post or news story.

`P` This surrounding area is the **`<aside>`** tag, meant for content related to the main content but separate, like an ad or a glossary.

7. Live Form Example H2

Full Name:
